Precautions

◆ Disable the print button before installing the battery. (Turning the unit upside down may push the print button and cause the unit to imprint after the battery is installed)

◆ After installing the battery, please charge the battery for 15 hours. When fully charged, full power reserve keeps the unit operational for 72 hours or 400 punches.
PIX-200 exclusive full power reserve battery shall be used. Using other batteries may

◆ damage the unit. It is possible that it may become the cause of fire, injury or defacement by liquid spill, bursting or becoming hot.

◆ Do not remodel or touch the unit with wet hands. Doing so may cause fire or electric shock.
